

Atlas Cyber Protect

Business network protection that watches your LAN, explains threats in plain language, and keeps your staff connected — without becoming your router.

Customer brochure · August 2026 · Working product (Protect box · Windows Agent 0.4.5 · Chat web & Android 0.4.0 · Atlas Connect)

What you get

- A silent **Protect box** on your business LAN
- Live device map, threat hunt, Fine / Neutralize choices
- **Windows PC Agent** on every staff PC
- **Atlas Connect** secure remote help
- Company **Chat** (web + Android app)
- Managers approve staff — one login for Chat & Connect

Why businesses choose it

- Works from any network for managers (cloud Funnel)
- Staff see only what they need (chat + their office PC)
- No “silent block everything” surprises — you decide
- Isolated per company — your chat never mixes with another business
- Daily server backups of Protect data for restore

Who uses what

Role	Manager — People, Approve users, Connect to company PCs, Chat, guest links, WFH approve. User / Employee — Company Chat + Connect to their assigned office PC (same email & password after Approve).
Protect box	Plugs into your switch/router LAN. Portal on the box (and private HTTPS link). Watches devices, traffic sample, internet/DNS, threats, network gear (read-only).
PC program	Atlas Cyber Protect Agent 0.4.5 for Windows — install on office & home PCs.
Phone app	Atlas Cyber Chat 0.4.0 Android APK — company chat on the go (same login).

Downloads (live)

Protect portal — every section

Overview

Live health, guardian feed, recent activity.

Devices

LAN devices, ping, ports. Select Windows PCs → Install agent.

PC Agents

Paired Windows agents: antivirus status, programs, versions, updates.

People

Company sign-in. Approve staff. Mark Manager or User. Assign office PC.

Atlas Connect

Secure remote sessions. Office PCs for managers; home PCs need Accept; WFH needs Approve + timer.

Chat

Company-only messaging. Full UI on Funnel + Android app.

Traffic

Bandwidth talkers Protect can see from the side-box.

Insights

Internet/DNS, network gear (gateways/switches/APs read-only), link warnings, agent health.

Threats

Risky services, new devices, gateway MAC hints — Fine or Neutralize.

Ask guardian

Plain-language helper on the Protect box — explains, does not change policy alone.

Windows Agent (PC program)

Install: AtlasCyberProtectAgent-Setup-0.4.5.exe

Sign in / Create account

Atlas Connect

Request help

AV scan (observe)

Outlook / link watch

Company Chat

The agent observes and warns. It does not silently delete customer files or rewrite the PC firewall for you.

Android Chat app

Install: AtlasCyberChat-0.5.0.apk → same company email & password as Chat web / People.

Security promises (honest)

- Companies are isolated — chat, people, and remotes do not cross businesses.

- Protect is a **side-box**, not your router/gateway.
- Threat actions need your Fine / Neutralize choice.
- Network gear logins stay on the Protect box; read-only unless FN.nology owner authorizes changes.
- Guest remote links expire (~15 minutes).
- Managers can End all connections if something looks wrong.
- Protect data is backed up daily on Atlas at 02:00 for restore.

One simple price

Atlas Cyber Protect Complete R8 000 / month — per site, unlimited PCs.

Everything is included — there is nothing extra to buy:

- Protect box on your LAN: devices, threats, PC agents, link guard.
- Atlas Connect remote help + guest links.
- Company chat (web + Android) — your staff stop using WhatsApp for work.
- Manager People workflow (approve staff, set roles).
- Network gear visibility; FN.nology only change-rights on routers/switches/APs.
- Automatic software updates — the system runs itself.
- Setup included, plus FN.nology support whenever you need help.

No hidden fees. One invoice, one price per month.

Link map (ops): [How everything links \(TXT\)](#)

Atlas · Protected by Atlas · FN.nology. This brochure only lists features that are live on Funnel / Protect box as of the date above.

Also from Atlas / FN.nology (separate products)

These are not required for Cyber Protect. Mention them only if the customer asks for wider Atlas services.

Atlas Neural

Owner / personal Atlas AI app (Android). Not the Protect customer SKU.

Atlas Factory

FN.nology floor / Factory tooling for building products — owner side.

Atlas Lore

Audiobook / story studio on Atlas — owner creative tooling.

FN.nology Business / DarkMoon

Separate commercial suite (quotes, assessments) when offered.

Customer onboarding (simple)

1. FN.nology installs / ships the Protect box → set business name.
2. Open portal → create first manager account.
3. Install Windows Agent on PCs (Devices → Install, or Setup 0.5.2 — it auto-updates).
4. Staff Create account → manager Approves on People.
5. Same login for Chat (web/Android) and Atlas Connect to office PC.

READY FOR YOUR BUSINESS

Atlas Cyber Protect

One Protect box. Clear threats. Staff chat. Secure remote help. Manager control.
